

Shark Tank

What good is an invention if no one knows about it? One of the obstacles that inventors face is marketing their product. You and your partner will be pitching your robotic product to me.

Robot requirements: Use at least 2 sensors (this does not include an additional motor).

Everything else is up to you! Be creative!

Presentation: -a minimum of 6 minutes (this includes the demonstration of your robot)

-visual aid for this presentation can be any combination of the following:

Power Point, video, webpage, poster, or a display. For any others, get approval.

-Remember your audience! You can involve your peers in the presentation!

-Present a problem, then give your solution.

Extra Credit: Dress up! Sloppy salesmen are going to be bad salesmen!
